

Project Design Phase

Problem – Solution Fit Template

Date: 28 June 2025

Team ID: LTVIP2025TMID28676

Project Name: Optimizing User, Group, and Role Management with Access Control and Workflows

Problem – Solution Fit Description:

The current project management system for a small team lacks structured user roles, access control, and clear workflows. This results in confusion over task assignments, accountability gaps, and difficulty tracking project progress. The proposed solution introduces a well-defined access control system, user roles, and automated workflows to address these challenges effectively.
